

Discover the Power of IP Video Combined with Wireless Mesh

State-of-the-art, rapid-deployment wireless IP video surveillance system

- ▶ Megapixel IP cameras from IQinVision (Booth 353)
- ▶ Cross-platform video management from Exacq (Booth 347)
- ▶ Scalable storage with embedded servers from Pivot3 (Booth 453)
- ▶ High-capacity MIMO wireless mesh from Firetide (Booth 447)

Deployed in a matter of hours, this system is a real-world example of what you can achieve in the field with the right combination of IP technologies. Visit our booths to find out why wireless IP systems are faster to deploy, cost less – and can deliver fiber-equivalent performance for real-time, evidence grade video.
