FOR IMMEDIATE RELEASE:

Exacq Technologies Introduces VideoPush for Exacq Mobile in version 6.8

exacqVision adds faster camera discovery, new camera integrations and more

(INDIANAPOLIS)— Exacq Technologies, part of the Security Products business unit of Tyco (NYSE: TYC), introduces faster camera discovery and VideoPush to mobile devices with exacqVision 6.8 and automatic backup of recorder configurations in Enterprise System Manager (ESM), a health monitoring program for use with exacqVision Enterprise network video recorders (NVRs).

The EasyConnect feature introduced last year has been enhanced in exacqVision 6.8. EasyConnect allows users to find, address and connect multiple IP cameras to their network automatically. Now, camera scanning takes half the time as it did previously. The faster camera discovery also improves the user's ability to find more cameras on busy networks and in more challenging network configurations where the camera and recorder are on different subnets.

exacqVision users can now utilize the VideoPush feature to and from Exacq Mobile. VideoPush gives exacqVision Enterprise users the ability to instantly push selected cameras, layouts, tours, groups or entire views to another exacqVision client monitor. With the latest release, Exacq Mobile now supports pushing video from the exacqVision client to a user with the Exacq mobile application open on their mobile device. This new feature enables greater collaboration between security professionals as they are walking around a site or working in various locations.

In addition to VideoPush, the latest Exacq Mobile app supports receiving and decoding H.264 video directly on the mobile device. Saving bandwidth and CPU on the server running the web service, it automatically negotiates whether to transcode or stream H.264 based on the specific mobile device performance.

ESM now allows administrators to automate and schedule recorder configuration backups. Administrators can configure backup exports on multiple servers simultaneously. With the new configuration management feature, ESM eases the management of backups in large environments.

The exacqVision VMS is accessed with the freely distributed exacqVision client software (Windows/Linux/Mac), the exacqVision free web browser client available for all leading web browsers (Google Chrome, Firefox, Internet Explorer, Safari and Opera), as well as the free Exacq mobile app for iOS, Android and Windows Phone 8 devices. The VMS software is included with pre-configured exacqVision NVR servers or it can be installed on third-party Windows or Linux-based systems.

For more information on this exacqVision software release and other new updates and offerings, go to www.exacq.com.

About Exacq

Exacq Technologies is part of the Security Products business unit of Tyco (NYSE: TYC), the world's largest pure-play fire protection and security company. Exacq Technologies (www.exacq.com) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.

Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific. Our products, built by developers from all product disciplines, consistently allow customers to see more, do more, and save more across multiple industries and segments including healthcare, government, transportation, finance, retail, commercial and residential. Worldwide, Tyco Security Products helps protect 42% of Fortune 500 companies, transportation systems on five continents, 37% of the world's top 100 retailers, over two million commercial enterprises, thousands of students in more than 900 educational facilities, and over five million private residences.
