FOR IMMEDIATE RELEASE:

Exacq Technologies Announces Integration with Sensormatic's New Synergy Series

exacqVision combined with real-time loss event data improves merchandise protection

(INDIANAPOLIS)— Exacq Technologies, part of the Security Products business unit of Tyco, announces an integration with the Sensormatic Synergy electronic article surveillance (EAS) detection system from Tyco Retail Solutions. The combination of exacqVision video management system (VMS) and the Synergy EAS Series gives retail customers an interconnected Tyco solution to capture loss event data with corresponding video and improve loss prevention efforts.

Synergy pedestals offer retailers a sleek, modern design to blend nicely into the retail environment with powerful capabilities such as Acousto-Magnetic (AM) detection and Radio Frequency Identification (RFID) item level reporting. The Synergy pedestals capture valuable loss prevention data to create a surveillance zone at store entrances and exits. When an alarm event occurs, the system notifies store employees when someone exits the store or if merchandise has the EAS (Electronic Article Surveillance) tag attached.

With the exacqVision integration, retail customers have the benefit of an added layer of video surveillance and real-time loss event insights. Retailers can see live video images of the alarm event as it is occurring or search previous EAS system events and see the corresponding exacqVision video at the time the event happened. exacqVision video recording can be triggered based on EAS pedestal alarms including jammer and metal foil detection, blocked sensor or deactivator offline, power save on or off, tag too close or alarm count. This integration enables retail store managers to quickly identify suspects for potential theft instances and improve their real-time response to shrinkage control.

This integration requires exacqVision server version 7.6 and Sensormatic Synergy firmware 101.03.00 to connect the Sensormatic pedestals and manage data output.

For more information on this exacqVision integration and other new updates and offerings, go to www.exacq.com.

About Exacq

Exacq Technologies is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Exacq Technologies (www.exacq.com) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web

browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.

About Tyco Security Products

Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific.
