

DATE OF PUBLICATION: MAY 23RD, 2018

CHANGE NOTIFICATION: 1012

RELEASE TO MANUFACTURING: JUNE 12TH, 2018

SUMMARY OF CHANGE:

Removal of VGA adapter included with hybrid and IP LC-Series NVRs (without PoE ports)

DESCRIPTION AND REASON FOR CHANGE:

On March 7th, 2018, the LC-Series motherboard on hybrid NVRs and IP NVRs was changed. The new motherboard meets or exceeds performance specifications of the LC-Series NVRs; however, the new motherboard does not provide a VGA port. At that time, Exacq included an HDMI to VGA adapter with these NVRs.

Beginning June 12th, 2018, the HDMI to VGA adapter will no longer be included with the NVR. Instead, the adapter is available as an optional purchase using the new option part number (5000-60050). More information on this new option number can be found on the exacqVision online catalog on the manufacturing release date.

This change will be effective June 12th, 2018.

For more information on the impacted parts, see below.

PART NUMBERS AFFECTED BY THIS CHANGE:

0804-02T-LC	0804-04T-LC	0804-06T-LC	0804-08T-LC	0804-12T-LC
1604-02T-LC	1604-04T-LC	1604-06T-LC	1604-08T-LC	1604-12T-LC
IP04-02T-LC	IP04-04T-LC	IP04-06T-LC	IP04-08T-LC	IP04-12T-LC
