FOR IMMEDIATE RELEASE:

Tyco Security Products and Hills announce exacqVision Training Series in Australia and New Zealand

Partnership adds value to grow Australian market

INDIANAPOLIS— Exacq Technologies, part of the Security Products business unit of Tyco, is pleased to announce a series of training classes in Australia and New Zealand in October, in support of Tyco Security Products' recent signing of Hills as a new exclusive distribution partner in the region. Exacq is a leading manufacturer of network video recorders (NVR) and video management system (VMS) software used for video surveillance.

In part, the agreement allows Hills to promote and sell exacqVision products to the Australian and NZ marketplace and to kick it off, Exacq will conduct a series of training classes to introduce the exacqVision product line to end users, architects and engineers, and consultants. The hands-on exacqVision training class will walk participants through how to install the exacqVision client. After completion, attendees will be able to easily complete an entire system installation and use the VMS software on a daily basis.

"We look forward to driving further growth in this region through our partnership with Hills," said Mark Romer, Tyco Security Products Regional Sales Director, Pacific. "The affiliation with Hills brings greater outreach and local expertise."

Hills has a reputation as a leading supplier in the Australian and New Zealand video security market. Hills will provide extensive pre and post-sales support to exacqVision customers.

For more information on Tyco Security Products, exacqVision products and other new updates and offerings, go to www.tycosecurityproducts.com or www.exacq.com.

About Exacq

Exacq Technologies is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Exacq Technologies (www.exacq.com) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.
