**FOR IMMEDIATE RELEASE:**

**Exacq Technologies Introduces Camera Links for Faster Response Time to Critical Alarms and Events**

*exacqVision 7.0 also includes event monitoring in Exacq Mobile, new IP camera integrations and more*

(INDIANAPOLIS)— Exacq Technologies, part of the Security Products business unit of Tyco, introduces CameraLinks, overlay controls for immediate response to events. The new exacqVision version 7.0 video management system (VMS) software also includes enhanced EasyConnect IP camera connection, updates to event monitoring in Exacq mobile and backup of server configuration in Enterprise System Manager (ESM), a health monitoring program for use with exacqVision Enterprise network video recorders (NVRs).

exacqVision 7.0 introduces camera links, which allow exacqVision users to configure overlay controls that will display when hovering over a camera in live view. This feature gives users the ability to adjust the overlay text color, font, style, transparency and location on screen to fit any of their camera views. The created camera links are visible across all client sessions and in all layouts and view configurations. Camera Links puts exacqVision users most needed commands at their fingertips and vastly improves their response time to critical alarms and events.

The EasyConnect feature, introduced last year, has been enhanced in exacqVision 7.0. EasyConnect allows users to find, address and connect multiple IP cameras to their network automatically. Now, EasyConnect shows users more detailed connection status feedback when connecting Illustra IP cameras and exacqVision E-Series video encoders. Having comprehensive, specific information regarding the connection and suggested troubleshooting guidance saves users time and money during installation.

exacqVision users can now utilize event monitoring from the latest Exacq Mobile app for iOS, Android and Windows Phone 8 devices. Any event monitors configured within the exacqVision client can be viewed in the mobile app. Event monitoring ensures mobile app users are aware of the most important video relating to events like motion detection, alarms and other triggered inputs to the system. In addition to event monitoring, the latest Exacq Mobile app supports two-finger swipe navigation for faster review of all camera views. Users can swipe to the left to load the next set of cameras into the viewing layout.

The new Enterprise System Manager (ESM) bulk configuration allows administrators to back up the settings of all servers across the enterprise at one time. With this new functionality, ESM makes it faster and easier for administrators to always have a backup of exacqVision recorder configurations.

The exacqVision VMS is accessed with the freely distributed exacqVision client software (Windows/Linux/Mac), the exacqVision free web browser client available for all leading web browsers (Google Chrome, Firefox, Internet Explorer, Safari and Opera), as well as the free Exacq mobile app for iOS, Android and Windows Phone 8 devices. The VMS software is included with pre-configured exacqVision NVR servers or it can be installed on third-party Windows or Linux-based systems.

For more information on this exacqVision software release and other new updates and offerings, go to [www.exacq.com](http://www.exacq.com).

## **About Exacq**

*Exacq Technologies is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Exacq Technologies ([www.exacq.com](http://www.exacq.com)) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.*

*Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific. Our products, built by developers from all product disciplines, consistently allow customers to see more, do more, and save more across multiple industries and segments including healthcare, government, transportation, finance, retail, commercial and residential. Worldwide, Tyco Security Products helps protect 42% of Fortune 500 companies, transportation systems on five continents, 37% of the world's top 100 retailers, over two million commercial enterprises, thousands of students in more than 900 educational facilities, and over five million private residences.*
