#### **FOR IMMEDIATE RELEASE:**

## **exacqVision 7.4, from Tyco Security Products, Delivers Integration for a Complete Video, Access Control and Intrusion Security Solution**

*exacqVision 7.4 also includes new health setup indicators, CameraLinks in Exacq Mobile, new IP camera integrations and more*

INDIANAPOLIS — With the release of exacqVision 7.4 video management system (VMS) software, Tyco Security Products introduces a native integration between exacqVision version 7.4 and the DSC [PowerSeries Neo](#) intrusion system. exacqVision version 7.4 video management system (VMS) software also includes new health setup indicators, filtering, CameraLinks in Exacq mobile and enhanced server management in Enterprise System Manager (ESM), a health monitoring program for use with exacqVision Enterprise network video recorders (NVRs).

This new integration combines DSC PowerSeries Neo intrusion into the exacqVision VMS software for seamless operation and simplified security management. With the existing [Kantech access control integration](#) introduced in exacqVision 7.2, exacqVision users can operate and control their complete security system including video surveillance, intrusion and access control from a single, easy-to-use client interface. Combining live and recorded video with access and intrusion detection events unifies security functions as an all-in-one solution, reducing duplicate efforts. CameraLinks puts exacqVision users most needed commands at their fingertips and vastly improves their response time to critical alarms and events.

With exacqVision version 7.4, a new text filter box appears at the top of the live, search and configuration navigation trees to find camera and server faster in the exacqVision client. In large enterprise installations, the new tree filtering allows a security operator to quickly locate their desired specific server.

To simplify installation, exacqVision 7.2 introduced setup indicators to guide installers through common configuration options to optimize their exacqVision configuration for ideal performance. Now in exacqVision 7.4, the setup indicators include notification for health events of the exacqVision system. Users will receive real-time notifications in the client when camera or video recorder health needs addressed such as storage, video throttling, system voltage, system temperature, IP camera connection lost, or video loss. The new health setup indicators ensure maximum uptime and increased reliability of exacqVision recorders and IP cameras.

The latest Exacq Mobile app for iOS, Android and Windows Phone 8 devices supports CameraLinks. Through the Exacq Mobile app, users can receive push notifications and review video footage when the security system goes into an alarm state. This feature provides Exacq mobile app users with the ability manage and control access control and intrusion events from one place for a complete, unified video surveillance system.

Enterprise System Manager (ESM) automatically coordinates multiple ESM user instances to ensure only one user is actively makes changes to the server. With this new functionality, ESM synchronizes actions being performed across multiple servers.

exacqVision VMS now supports nearly 3,000 IP camera models including the new Illustra Pro 2MP 30x PTZ and Samsung Techwin America's new WiseNet Lite line of cameras.

The exacqVision VMS is accessed with the freely distributed exacqVision client software (Windows/Linux/Mac), the exacqVision free web browser client available for all leading web browsers (Google Chrome, Firefox, Internet Explorer, Safari and Opera), as well as the free Exacq mobile app for iOS, Android and Windows Phone 8 devices. The VMS software is included with pre-configured exacqVision NVR servers or it can be installed on third-party Windows or Linux-based systems.

For more information on this exacqVision software release and other new updates and offerings, go to [www.exacq.com](http://www.exacq.com). For information on DSC PowerSeries Neo, go to [www.dsc.com](http://www.dsc.com).

#### **About Exacq**

*Exacq Technologies is part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. Exacq Technologies ([www.exacq.com](http://www.exacq.com)) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.*

#### **About DSC**

*DSC Intrusion Security products are part of the Security Products business unit of Tyco, the world's largest pure-play fire protection and security company. DSC provides security professionals with products of superior quality and performance in more than 140 countries worldwide. They include alarm control panels, keypads, user interfaces, detection devices, alarm communication products, and industry-leading alarm monitoring technology. More information on DSC can be found at <http://www.dsc.com>.*

#### **About Kantech**

*Kantech access control solutions are part of the Security Products business unit of Tyco (NYSE: TYC), the world's largest pure-play fire protection and security company. Kantech access control technologies are ready to use right out of the box, and provide solutions that are compact, and easy to use for smaller businesses while scaling to meet the needs of larger businesses. Kantech solutions can easily link to American Dynamics video systems and DSC alarm panels to provide an integrated, holistic security solution. To learn more about Kantech products, visit [www.kantech.com](http://www.kantech.com).*

#### **About Tyco Security Products**

*Tyco Security Products and its leading brands conducts business in over 177 countries around the world, in multiple languages and employs over 2,800 employees globally, including research and development, marketing, manufacturing, sales, service and logistics teams in the Americas, Europe, the Middle East, Africa, and Asia Pacific.
