**FOR IMMEDIATE RELEASE:**

## **Tyco Security Products Introduces New exacqVision M-Series All-in-One Video Recorder** *Cost-effective PoE recorder ideal for customers looking for a 4 to 8 IP camera solution*

**WESTFORD, MA, November 15, 2016** — Tyco Security Products introduces the new exacqVision M-Series, a cost-effective network video recorder that is easy to install and use. The exacqVision M-Series expands the All-in-One Recorder category Exacq launched last March with the [LC-Series PoE+ recorder](#). Similar to the higher-capacity, higher PoE power LC-Series, the M-Series includes integrated PoE camera ports and the feature-rich exacqVision START video management software, which can easily be upgraded to the Professional or Enterprise software.

Users can connect up to eight IP cameras per recorder and can view and administer live and recorded video directly from the recorder using the included exacqVision client or remotely using a web browser or exacqVision client on a separate computer. The free [Exacq Mobile app](#) also allows users to view live and recorded video on iOS or Android mobile devices.

“It’s always our goal to provide the most cost-effective, intuitive video solutions to our customers,” said Ryan Hulse, Senior Product Manager, Tyco Security Products. “The exacqVision M-Series does exactly that – bringing unique PoE camera management and reliable video recording performance at a price point that is appealing to smaller applications.”

Like all exacqVision recording solutions, the M-Series is very easy to install, utilizing exacqVision EasyConnect to find, address and connect [illustra](#) and other IP cameras to the network automatically and self-configure for motion-based recording. This enables users to simply plug in their IP cameras and start recording, significantly reducing installation time and labor. To further simplify maintenance, the M-Series recorder enables users to remotely monitor and control power to individual cameras with no separate switch management software required.

For more information on M-Series and other new updates and offerings, go to [www.exacq.com](http://www.exacq.com).

## **About Exacq**

*Exacq Technologies from Tyco Security Products is now part of Johnson Controls, a global diversified technology and multi industrial leader serving a wide range of customers in more than 150 countries. Exacq Technologies ([www.exacq.com](http://www.exacq.com)) designs and manufactures the cross-platform, open-architecture exacqVision video management system (VMS) used in the physical security industry for IP video surveillance. exacqVision is available on factory-installed hybrid and IP camera servers or on commercial off-the-shelf servers. It can also be installed directly on compatible IP cameras, eliminating the need for a separate server. Video from exacqVision servers can be accessed with the free, cross-platform (Windows/Linux/Mac) client, most web browsers and via the free Exacq Mobile app available for iPhone, iPad and Android devices. Exacq's products are available throughout the world via authorized resellers and distributors.*

*[Tyco Security Products](#) is now part of Johnson Controls, a global diversified technology and multi industrial leader serving a wide range of customers in more than 150 countries.
